### CONCURRENCE ON FINAL SITE INVESTIGATION (SI) REPORT FOR SITE 38, FORMER SKEET RANGE, BEALE AIR FORCE BASE (AFB), YUBA COUNTY

Dear Mr. O'Brien:

The Department of Toxic Substances Control (DTSC) has reviewed the subject document (Final SI Report), dated August 31, 2005. DTSC provided comments on the Draft SI Report, dated February 11, 2005, via e-mail on May 11, 2005. Site 38 is the Former Skeet Range (former Area of Concern 71), and has surface and near-surface soils, and sediments contaminated with Polycyclic Aromatic Hydrocarbons (PAH) and lead at concentrations that require remediation. The Final SI Report presents field activities, analytical results, conclusions, and recommendations. The most notable recommendation was to perform an Engineering Evaluation/Cost Analysis for the removal of the contaminated soil.

DTSC concurs with the Final SI Report. Beale AFB has adequately addressed comments on the Draft SI Report through responses to comments, working meetings, and the Final SI Report.

If you have any questions or concerns regarding this letter, please call Mr. Terry Escarda of my staff at (916) 255-3714 or via e-mail at [tescarda@dtsc.ca.gov](mailto:tescarda@dtsc.ca.gov).

Sincerely,

Anthony J. Landis, P.E.  
Chief  
Northern California Operations  
Office of Military Facilities
